DETAILED ACTION

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. The indicated allowability of claim 62 was based in part on the claimed feature that the inhibiting layer is actually imbedded in the second conductive layer, however, the drawings merely show the inhibiting layer formed on the top surface of the second conductive layer, and not imbedded therein.

It is the examiner's position that amending the drawings to clearly show this claimed feature would not constitute new matter inasmuch as this inventive feature was clearly supported in the specification as originally filed.

The drawing requirement made in the previous action with respect to claims 64, 66 and 74 is withdrawn in view of applicant's remarks in the paper dated 8-11-06.

In order to avoid abandonment, the drawing informalities noted above with respect to the feature described in claim 62 must now be corrected. Correction can only be effected in the manner set forth in the above noted paper.

Prosecution on the merits remains closed in this application.

A shortened statutory period for reply to this action is set to expire **ONE MONTH** from the mailing date of this letter.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Edward Wojciechowicz whose telephone number is 571-272-1739. The examiner can normally be reached on Monday through Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ken Parker can be reached on (571) 272-2298. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
